	Sgt Hoagland, IC, briefed participants on the incident. 7000 pounds of magnesium exploded at the US Ecology site in Grand View. Two persons were injured and one is still missing. There are several other buildings around containing unknown mixed chemicals. He is requesting a decontamination unit because hospitals are refusing to accept the patients until they are decontaminated by a certified decontamination unit. Brad Trosky, RRT3, advised they have a two hour ETA and dropped off the call to initiate their response. Doug Tanner, DEQ, requested to know if the Fire Department is working on the smoldering building. Sgt Hoagland advised they are not because the magnesium is reactive to water and makes it worse. He also advised there is no danger from smoke. The danger would come from skin contact. Aaron Scheff, DEQ, asked if they had been able to determine what was in the surrounding buildings. Sgt Hoagland advised there are metal containers with flammable waste and oxidizers in the buildings. Personnel have not been able to get into the office where the paperwork is stored due to a roof collapse.

Brian Crawford, HD3, advised he would call the hospital to help with information regarding the treatment of the patients. Steven Ball, EPA, asked if the US Ecology personnel were in contact with the Incident Commander in terms of stabilizing the site and any clean up help they may need. Sgt Hoagland, IC, updated the participants that RRT3 has arrived on scene and they believe they have found the body of the missing person. RRT3 will send a crew in to identify that it is in fact a body. The recovery of the body may have to wait until tomorrow due to the fact that it is covered by debris and heavy equipment may be needed to be brought in. Mark Dietrich, DEQ, requested an update on the smoldering, the structure, and the remaining containers. Sgt Hoagland advised there doesn't seem to be anymore smoldering and the last explosion was at 1230 hours. He also advised no one has been able to go in and identify the other materials in the buildings. Mark Dietrich asked, if possible, to have someone find out what other materials are present. Natalie Cree, DEQ, stated US Ecology should have computer records of all the materials contained at the site.
